**Q14 How the study of Skeleton was important for Archaeologist?
what is the problems associated with it?**

A .By the study of skeleton Archaeologist can find out whether a skeleton was that of a man or a women ? Sometimes people decide on the basis of what is found with Skeleton. For example . jewellery found with dead. However there is a problem with this ,men also wore ornaments.

So a better option they suggested to figuring out the sex is that of bone structure.

Q15 How it is possible to find out wether burial spots meant for certain families?

A. sometimes ,Megaliths contain more than one skeleton . These indicate that people ,perhaps belonging to the same family ,were buried in the same place though not at the same time.
